

VIVID COLORS

Men are increasingly reaching for bold colors in suits. Bottle green, deep burgundy, chocolate brown, navy blue and shades of red are at the forefront of trends. These types of colors will work well both at elegant, evening ceremonies and during less formal celebrations.

MODERN CHECKERED

Checked suits combine traditional patterns with modern cuts and bold colors, offering elegant yet expressive styles. An interesting trend is combining different patterns and textures in one suit, for example, combining a small check blazer with plain trousers, which gives the style a modern but still elegant character.

DOUBLE- BREASTED JACKET

Double-breasted jackets are back in favor, giving the silhouette elegance and class. Especially popular are those with a slightly looser cut, which provide comfort of wearing. Designers reinterpret classic silhouettes, creating modern versions of double-breasted jackets that shape the figure, emphasizing wide shoulders and a narrow waist.

CREATIVE FORMALITY

Designers experiment with traditional formality, introducing modern elements into suits. The catwalks are dominated by innovative cuts and details that give classic suits a contemporary feel.

TECHNICAL SUIT

Tailoring with a technical spec, designed for the commute and more, is now widely understood by consumers and an integral part of many brands' ranges. While performance qualities such as non-crease and antibacterial or shower-proof coatings are at the core of this story, it's worth incorporating contemporary styling to expand your offer – take note of the Comfort Tailoring trend.
